MT2010™ **10.1" RUGGED TABLET**
– Light and thin, but still rugged

You need a tablet for your field service or warehouse employees that is rugged enough to stand up to the abuse every day and can run the applications and software you are already using? That is where the MT2010 rugged tablet comes in.

The MT2010 withstands a 4-foot drop without a problem and runs full version of Windows. The large display of the 10.1-inch projected capacitive touchscreen is sunlight-readable so you can work outside as easily as inside. No more squinting at a small, difficult-to-read screen.

Tired of dealing with the repair costs of consumer grade tablets?
The MT2010 is IP65 dustproof and water resistant and will work in temperatures of -20 to +50 °C (-4 to +122 °F). With light weight and no more than 0.75 inch thick, you can easily mount the MT2010 in your field service technicians' trucks where they can remove it to use on the job.

Get everything you need, and nothing you don't
The MT2010 rugged tablet can be customized to your specifications. Example of customizations include:

• Add more storage to your computers if you need it to run certain applications.

• Modify the operating system to increase its security.

• Install safety features that reduce the risk of data loss and corruption.
